Operation How Many Dogs Can Fit In A Sprinter Van And What Will It Smell Like After 5000+ Miles

10 dogs were brought to the West coast from across the country, 5000+mi and 96hrs driven. All are in fosters from BC to SoCal. They need vetting, alter, DS surgeries and learn what it's like to live the life as a pampered pet.

Makeda - 2.5yo, mother to Lucy, Baron. Fostered in N. BC
Bella - 3.5yo, fostered by Lorraine
Lozi - 3.5yo, dermoid cluster, abscessed, fostered in NW WA
Lucy - 8mo, midget - looks 4mo
Lola - 14mo, blue eyes fostered in Central CA
Clint - 8mo, two dermoids, fostered by Debbie Brower
Brewer - 8mo, dermoid, fostered in N Central WA
Disco - 18mo, one eyed, fostered in Albany area
Iris - 8mo, fostered by Jennifer Annell
Baron - 8mo, fostered in Vegas

At the start of the trek, it was thought 4 were possibly pregnant, one imminent as she had milk. We are happy to report, none are pregnant!

All will be available for adoption within a couple months. In just 1.5wks time the dogs have made huge strides towards becoming dogs again—which make the utter, sheer, complete exhaustion of our Rescue Angels so worth it!

Thank you to all the NWRRC members who opened their homes and hearts to help these dogs, from fostering to transport to providing a place to crash for a few hours and a shower.
